Technical data sheet
Polypropylene – Heterophasic Copolymer
Produced in Europe

Description

Total Petrochemicals PPC 2660 is a heterophasic copolymer polypropylene with a Melt Flow Index of 0.8 g/min for the manufacturing of films with very good mechanical properties in the blown process.

Polypropylene PPC 2660 is intended for applications requiring high mechanical properties like heavy duty bags, lamination films, retortable food packaging,...

Properties measured on a $40\mu m$ thick film produced on a blown film line following TOTAL internal conditions.

When considering these film properties, it should be taken into consideration that film properties are strongly dependent from processing conditions.

Handling and storage

Please refer to the safety data sheet (SDS) for handling and storage information. It is advisable to convert the product within one year after delivery provided storage conditions are used as given in the SDS of our product. SDS may be obtained from the website: http://www.totalrefiningchemicals.com
